

FEDERAL CIO COUNCIL

INFORMATION SECURITY AND IDENTITY MANAGEMENT COMMITTEE

2009 FEDERAL IDENTITY MANAGEMENT AND CYBERSECURITY CONFERENCE

The Information Security and Identity Management Committee (ISIMC) of the Federal CIO Council is taking steps to deliver on the President's pledge for cybersecurity. ISIMC will discuss strategies and tactics for securing and defending Federal IT systems and networks for trusted and reliable global communication.

The objectives of this conference are awareness, education, and alignment toward a common vision for cyber defense within the Federal community.

This conference will focus on protecting the nation against cyber aggression, while preserving and protecting the personal privacy and civil liberties that are the core of American values.

HOSTED BY The Information Security and Identity Management Committee (ISIMC), which supports the Federal CIO Council in enabling Chief Information Officers (CIOs) and Chief Information Security Officers (CISOs) to collaborate on: (1) identifying high priority cybersecurity and identity management initiatives; and (2) developing recommendations for policies, procedures, and standards to address those initiatives that enhance the security posture and protection afforded to Federal Government networks, information, and information systems.

TOPICS INCLUDE

- Nation's Top Cybersecurity Challenges addressed by a Panel of Government and Private Sector Leaders
- US-CERT and the Challenging Landscape of Federal Cybersecurity
- Security Performance - What Is Next?
- Innovation, Cloud Computing and Web 2.0
- Federal Desktop Core Configuration Next Steps
